### Languages:

**Basic:** English;

**Native:** Spanish.

## EDUCATION

### Tecnológico Nacional de México Campus Celaya –

Computer Systems Engineering, October 2020.

### CERTIFICATIONS

**Angular from Zero to Expert** – Udemy.

2020.

**Flutter: Development for IOS and Android**

– Udemy. 2020.

Full-Stack Developer with more than 4 years of experience collaborating in multidisciplinary teams. My focus is on creating innovative technology solutions for both public and private organizations. My skill set includes JavaScript, PHP, Ionic, VueJS, and Laravel.

I am constantly motivated to face new challenges and learn from them to expand my knowledge. I enjoy sharing what I've learned with my teammates, as I believe in collective growth. My goal is to be part of a high-performance team dedicated to the development of solutions in the SaaS industry, contributing to the evolution of this area with my experience and passion for technology.

## EXPERIENCE

### DEPORPRIVE

**Back-End Developer** — April 2021 – Present

I played the role of Project Leader in the creation of a new line of services of the company, where I developed web scraping algorithms to collect more than 4 million pieces of data relevant to the growth of the business. Through this project, we were able to strengthen business relationships with various clients, generating immediate benefits for the company.

**Tech stack:** VueJS, Laravel, Php, Prestashop.

### GoFun World SL

**Front-End Developer** — February 2023 – October 2023

Participation in the development of front-end related activities and tasks in the system, which has contributed significantly to the creation of improvements and the maintenance of the quality of the system. Over time, I have gained experience in advanced technologies such as Node.js and Kotlin, allowing me to develop endpoints, carry out tests and take on full-stack responsibilities, thus addressing new challenges in the project.

**Tech stack:** VueJS, NodeJS, Kotlin.

### GUAYABA TECH

**Full-Stack Developer** — November, 2019 - March, 2021

Successful implementation of the Laravel framework to strengthen the back-end, achieving a notable increase in project security and effective optimization in microservices querying. I collaborated in several projects that allowed us to identify and meet the critical needs of the companies to which we provide our development services.

**Tech stack:** JavaScript, Ionic, Laravel, Angular

### VENEGAS & CHAVEZ CONSULTORES

**System Administrator** — June, 2018 - November, 2019

I established the systems area in an accounting firm, creating a system that transformed manual processes into digital ones. Based on the accountants' previous research, this system calculates the financial risk of legal breaches, assessing the likelihood of auditing by the authorities.

**Technology stack:** HTML, PHP.

## PROJECTS

**Blabla Puerto (Guayaba Tech)** – April 2022

Update of mobile application similar to the Blablacar application, said application is for use of inland port companies in the city of León Guanajuato. Through this development, the UX and UI were improved, and the size of the application was reduced by 30% based on a previous version of this system.

**21st Century Auto-Service (21st Century)** – July 2022

Development of web application for company control, inventory, sales and purchases. In this project, the server configuration and everything related to the deployment to production were also developed. Through this system, the company's inventory control is digitized, reducing supply losses by 90% compared to the previous control.

**Technology stack:** VueJS, Laravel, Nginx, DigitalOcean, Ionic.
